

## Instapak® 901

Foam-In-Place  
Packaging System

Compact,  
Reliable And  
Simple To Use

### THE MOST ADVANCED HAND-HELD DISPENSING SYSTEM

The Instapak® 901 series system is the workhorse of the Instapak® family. With the backing of Sealed Air service and packaging design technicians, the Instapak® 901 system provides consistent custom, engineered foam-in-place protection time after time.

### SUPERIOR DAMAGE PROTECTION

Each package is a custom-fit foam solution, and our family of foam options can provide extra rigidity or lower density as you require.

### REDUCE YOUR CUBE SIZE

An Instapak® foam-in-place package provides just the right amount of packaging. High performance Instapak® foams allow you to reduce package size and weight without sacrificing protection.

### INCREASE YOUR VELOCITY BY REDUCING DOWNTIME

The all-electric Instapak® 901 system installs in minutes. No scheduled maintenance is required. Electric metering pumps and self-diagnostic controls guarantee top quality Instapak® foam.

## The Industry Standard for Foam-In-Place

### A BETTER PACKAGING EXPERIENCE

A custom Instapak® foam-in-place package produces specifically designed cushions for ultimate protection and efficiency.

### FLEXIBLE OPTIONS

The Instapak® 901 system can be adjusted to dispense foam at the ideal rate for your application. Swivel fittings allow easy and flexible foam dispensing. The Instapak® 901 foam output rate is 2 to 4 kg/minute.

### THE RIGHT SYSTEM FOR YOU

The Instapak® 901 system uses 210 litre drums of Instapak® liquid foam, and is designed for a variety of small, medium or large on-demand packaging operations. The small, compact configuration and Instapak® foam, that expands on-site up to 280 times it's original volume, reduces storage and maximises floor space.

#### UTILITY REQUIREMENTS

##### Electrical

380 / 400 VAC, 3 phase, N, GND  
16A, 50 / 60 Hz

##### Receptacle Type:

CEE 17 (5-pole, 16 A)

For important operating and safety information, please see the "Recommendations for the Safe Use and Handling of Instapak® Foam-in-Place Components" guide.
